Precision Air Inflator

User: beginners to professional

Description: The state-of-the-art Precision Air automatically sizes air-filled latex balloons without heavy cylinders, noisy air compressors or time-consuming templates. The powerful motor with digital controls accurately sizes two air-filled balloons simultaneously at the touch of a foot pedal. Extension tips designed to fill 5" and smaller balloons and are easily removed to inflate larger balloons. Includes a carrying case with shoulder straps to protect the unit during transportation.

Additional features: built-in cycle counter; digital controls; removable extension tips; foot pedal control; safety fuse; carrying case.

£790.40

Dual Split-Second Sizer

User: beginner to professionals

Description: Worldwide, the professional's choice! Everyone on your staff can achieve professional results at the tap of a foot pedal. Gets jobs done quicker, more efficiently, and best of all, more profitably! The Dual Split-Second Sizer is the most versatile inflator on the market. Precisely adjust the inflation time by tenths of a second for precision-sizing of one or two balloons. Works with helium or nitrogen cylinders, or an air compressor.

Additional features: double bubble outlet, auto-fill foil outlet, primary and second stage regulators, foot pedal, carry case.

£762.32

Duplicator 2

User: retail/decorators beginners to professional

Description: The Duplicator 2 automatically inflates latex balloons at the touch of a button. The separate auto-filling outlet inflates foil balloons to the correct pressure and size. Automatic sizing ensures that balloons are properly inflated and eliminates costly balloon breakages. The perfect choice for bouquets and centrepiece designs, the Duplicator 2 is an essential tool for decorators and storeowners alike. It can be powered by helium, nitrogen, or from an air compressor. Now available with foot pedal control option. Carrying case optional extra.

£400.40

Dual Sizer & Duplicator 2 accessories

To make your Dual Sizer or Duplicator 2 even more versatile Conwin have produced the following accessories:

Portable Power Pack: make your Dual Sizer or Duplicator 2 completely portable with the Power Pack. It provides power for over 5 hours of continual use and features a built in meter and a recharger. Ideal for trade shows, balloon releases and events in marquees when power is not always easy to find.

£166.40

Digital Sizer Conversion Kit: enables Dual Sizer or Duplicator 2 to operate with Air Products 300 BAR lightweight Heligas cylinders.

£24 available through Air Products 0800 920920

Add-on foot pedal: with the add-on foot pedal, two people can use the Dual Sizer or Duplicator 2 at the same time.

£28.33

60/40 helium/air outlet: inflate 16" and larger balloons with a mix of 60% helium and 40% air. Save 40% of your helium costs.

£35.89

Hi-Float outlet: inflate balloons neck up without getting Hi-Float into your inflator.

£25.27

Air compressor hook-up: works up to 12 feet away. Includes quick disconnect fittings and a filter that prevents dirt and moisture from entering your inflator.

£54.68

Helium/nitrogen quick switch: snaps on the back of your Dual Sizer with a quick-disconnect fitting. Change from helium to nitrogen with the flip of a switch. Also works with air compressors. Includes hose and primary regulator for nitrogen cylinder.

£98.17

Precision Plus Inflator

User: beginners to professional

Description: The number one choice for balloon professionals! The Precision Plus lets you inflate foil balloons automatically to the perfect pressure and size. Costly foil balloon breakages are eliminated, and maximum flying time is assured. The foil inflator points

downwards to allow for fast one-hand inflation of valved foil balloons. Features a separate outlet for manual inflation of latex balloons, hand-tight connection, pressure gauge, ribbon cutter and disc-tying post.

£67.29

Extension Hose Inflator

User: beginners to professional

Description: The 10ft. Extension Hose Inflator features two outlets for fast, simultaneous inflation. The versatile quick-disconnect fitting lets you easily change the second inflating outlet to meet the specific need for any job. Ideal for use with Hi-Float. Balloons can be inflated downwards, away from your face in case of popping. Snap-on outlets sold separately.

£66.99

Air Force 4 Inflator

User: beginner to professional

Description: Quadruple your production with the Air Force 4. It features four outlets for fast simultaneous inflation and a powerful motor. Outlets feature special tips for inflating small balloons. It also has a 25' detachable electrical cord that is convenient for on-the-job decorating. Now available with optional add-on foot pedal to let you inflate balloons with foot pedal control.

£197.60

Conwin Classic Inflator (with gauge)

User: beginner

Description: these Classic Inflators are convenient and reliable. Features hand-tight connection, ribbon cutter and disc-tying post. Classic Inflators come with either push valve or flex-tilt valve.

£41.67

Economy Inflators

User: rental

Description: Conwin's most basic model, the durable Economy Inflator is great for rental cylinders with easy hand-tight connection. Tapered tip enables inflation of latex and foil balloons.

£16.43

The Workstation

Great for latex, great for foils! Ideal for creating a safe and efficient balloon workstation; both in the store and when out on a job. With the Workstation you can inflate balloons up to 12 feet away from your helium or nitrogen cylinders.

£150.00

Air-Pro

Conwin's new Air-Pro countertop air inflator is ideal for fast inflation of air-filled balloons. The Air-Pro quickly and easily inflates all size balloons by pressing down on the push valve outlet. The push valve features an extension tip outlet for inflating small latex balloons and foil balloons. The Air-Pro motor runs only during the inflation cycle making it an ideal inflator for retail settings. Unit features a convenient carry handle and 6 foot power cord.

£105.00

Dual Outlet Speed Inflator

Works twice as fast! Ideal for balloon releases and vending latex balloon. Features two high-flow outlets for fast simultaneous inflation, ribbon cutter and disc tying post are positioned on all stations. Inflation outlets are positioned around the cylinder to insure maximum stability with multiple workers.

£94.26

Triple Outlet Speed Inflator

Features three high-flow outlets for fast simultaneous inflation without distorting the shape of the balloons. Other features as Dual Outlet Speed Inflator.

£108.50

60/40 helium/air Inflator

Ideal for use with 14" and larger balloons, the fast flow push valve mixes 40% air with 60% helium, saving you helium costs. You can also inflate with 100% helium by covering air intakes, this inflator pays for itself in no time!

£73.25

Conwin balloon equipment manufactured for Air Products

300 BAR Lightweight Heligas cylinders:

Push Valve Inflator (2 per Pack) – H45

Fast flow push valve is ideal for inflating all size latex balloons

£ 22 available through Air Products 0800 920920

Universal Inflator (2 per Pack) – H46

HEIDI

User: beginners to professional

Description: HEIDI is the new generation of digital inflator. Connected to an air-compressor, helium or nitrogen tank, HEIDI will inflate individual balloons, two balloons simultaneously, or two balloons simultaneously to different sizes faster than other brands, because she is fitted with larger internal tubing. HEIDI is designed to run at a low 30psi, so will accurately size balloons longer than other inflators. HEIDI is 12V, so can operate plugged into a vehicle cigarette lighter. HEIDI has built-in filters designed to protect her valves from being damaged by balloon dust and sticky substances.

Additional features: Two foot pedals, regulator with gauge and hose, 12V transformer, instruction book & CD, soft carry case, modelling balloons and 5" balloon brass inflating nozzles.

£590

Company: Premium Balloon Accessories

Head Office: Ohio, US

Initially established in 1947, spun off as Zibi-Core in 1983 and incorporated as Premium Balloon Accessories in 1989.

Mini Cool Aire Inflator

Description: The Mini Cool Aire Inflator is about 40% smaller, 30% more powerful and 25% lighter than the original Cool Aire II. It is also noticeably quieter than the current Cool Aire Inflator. This new inflator will inflate all types and sizes of balloons and while its more powerful motor runs slightly warmer than the Cool Aire II or Pro, the Mini Cool Aire still runs cooler than all other

competitive inflators.

Additional features: cord wrap for storage of power cord; built-in nozzle adapter holders; sound absorbing polymer inside unit for quieter operation; 3-way rocker switch for momentary/on/off power; extra long electrical cord; CE approved 230V Euro/UK versions as well as 120V US version; unconditional 1-year warranty against all parts and labour defects.

Accessories include: Hands-Free foot pedal for on/off operation (must be ordered with Euro/UK version); a sturdy, foam-filled, soft-shell carrying case.

Protected Under U.S. Patent No. 5,199,847 with worldwide patents pending.

Cool Aire® PRO Balloon Inflator

Description: The heavy-duty and more durable Cool Aire® Professional is for balloon artists and professionals who inflate large quantities of air-filled balloons for parties, decorations and special events.

Features include: easy-to-use rocker switch for continuous use or momentary use when nozzle is pressed down; heavy duty construction; 30% more powerful than the Cool Aire II; extra power for quick inflation, air remains at the same constant cool temperature; inflates all balloons including 260's ; three great adapters for ALL style balloon necks; 110-volt or 220-volt; CE Approved; cool green colour.

Cool Aire® II Balloon Inflator

Description: The Cool Aire® II Inflator is for professionals who inflate smaller quantities of balloons and do not require the heavy-duty inflator for continual, long-term inflation of air-filled balloons. It is Premium's entry-level work horse.

Features include: easy-to-use rocker switch for continuous use or momentary use when nozzle is pressed down; heavy-duty, durable unit; extra power for quicker inflation; air remains at the same constant cool temperature; three great adapters for all style balloon necks; 110-volt or 220-volt; CE approved; cool blue colour.

All Cool Aire Inflators are available from Amscan, Icarus, Pioneer Europe and Up, Up & Away.

Company: Zibi Balloon Accessories

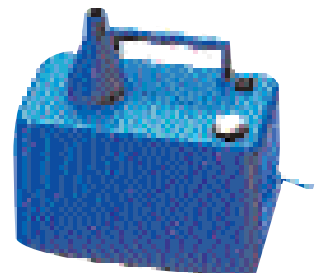

Head Office: Herznach, Switzerland

Z-32 Air Inflator

User: beginners to professional

Description: Most popular inflator for all sizes of airfilled balloons without heavy cylinders and noisy air compressors. The unit is equipped with a powerful motor, is durable, small and easy to handle.

Additional features: owner's manual; adapter; plug with safety fuse; button for pulsed operation; switch for continuous operation; CE approved.

£74.59

Z-42 Air Inflator

User: beginners to professional

Description: Very popular inflator for all types of air-filled balloons without heavy cylinders and noisy air compressors. The unit can be operated single-handed, is equipped with a powerful motor, is durable, small and easy to handle. A new and special technique prevents this unit from overheating.

Additional features: owner's manual; plug with safety fuse; press down lid for pulsed operation; switch for continuous operation; 2 different adapters; CE approved.

£82.12

Z-16 Automatic Air Inflator

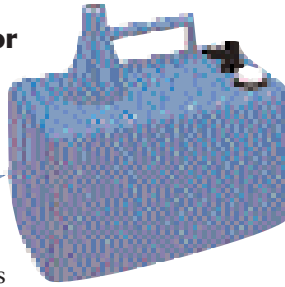

User: beginners to professional

Description: Automatic inflator for air-filled latex balloons without heavy cylinders and noisy air compressors. The unit is equipped with a powerful motor and a precise sizer, is durable, small and easy to handle.

All balloons inflated to the same size and make your decoration look uniform.

Additional features: owner's manual; timer (sizer) with safety fuse; plug with safety fuse; button for automatic operation; switch for continuous operation; adapter; CE approved.

£108.81

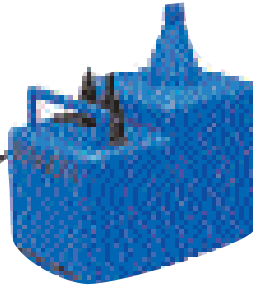

Z-46 Automatic Air Inflator

User: beginners to professional

Description: Automatic inflator for air-filled latex balloons without heavy cylinders and noisy air compressors. The unit can be operated single handed, is equipped with a powerful motor, precise sizer, is durable, small and easy to handle. All balloons inflated to the same size and make your decoration look uniform.

Additional features: owner's manual; timer (sizer) with safety fuse; plug with safety fuse; press down lid for automatic operation; switch for continuous operation; 2 different adapters; CE approved.

£118.39

Z-12 Battery Operated Inflator

User: beginners to professional

Description: Independent of electrical current! Battery operated inflator for modelling and spaghetti balloons, also suitable for all types of small inflatables. This unit is portable and equipped with a shoulder strap and battery charger. A fully charged battery inflates approx. 80 modelling balloons. Works also while plugged in.

Additional features: owner's manual; battery charger; shoulder straps; manufactured to meet CE guidelines.

£135.50

Z-40 Automatic Helium Inflator with Air Admixture

User: beginners to professional

Description: Excellent inflator for promotional balloons. With this new inflator, balloons can be inflated with helium or, by simply removing a small tool, mixes air with the helium. Save 30% on helium. As with all ZIBI inflators, it is small and durable, lightweight and easy to handle. All balloons inflated to the same size and look uniform.

Additional features: owner's manual; timer (sizer) with safety fuse; plug with safety fuse; pressure reducing valve; pressure hose; press down lid for automatic filling; refill button; adapter; manufactured to meet CE guidelines.

£201.88

Z-15 Automatic Helium Inflator

User: beginners to professional

Description: Inflates all sizes of balloons exactly to the size set on the timer switch. Works with helium or nitrogen cylinder or air compressor. As with all ZIBI inflators, it is small and durable, light-weight and easy to handle.

Additional features: Owner's manual; timer (sizer) with safety fuse; plug with safety fuse; pressure reducing valve; pressure hose; refill button; button for automatic filling; switch for continuous operation; manufactured to meet CE guidelines.

£187.51

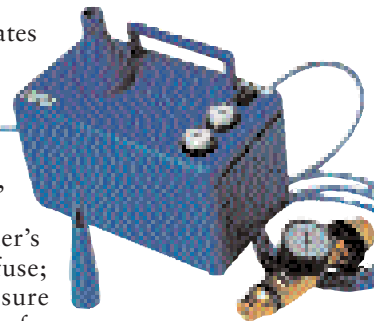

Z-54 Inflator for Air and/or Helium

User: beginners to professional

Description: This machine inflates both air-filled and helium-filled balloons. Helium and air can even be mixed. As with all ZIBI inflators, it is small and durable, light-weight and easy to handle.

Additional features: Owner's manual; plug with safety fuse; pressure reducing valve; pressure hose; button for helium; button for air; switch for continuous air; adapter; manufactured to meet CE guidelines.

£210.09

Z-56 Automatic Inflator for Air and/or Helium

User: beginners to professional

Description: This machine inflates both air-filled and helium-filled balloons. Helium and air can even be mixed. The timer can be used for both, helium and air.

Additional features: Owner's manual; timer (sizer) with safety fuse; plug with safety fuse; pressure reducing valve; pressure hose; switch to choose air or helium; start button for automatic filling; button for air, manual filling; button for helium, manual filling; 2 adapters; manufactured to meet CE guidelines.
